#MoliantMawrth

Today's testimonial is from the parents of one of our current pupils.

Two years ago, our handsome son started at Heol Goffa, after a huge transition of moving from England to Wales. For any child, such a change would be significant, but for our son who has an

acquired brain injury, cerebral palsy, autism, epilepsy and Neuropathic bowel and bladder, it was even more daunting. Yet, thanks to the incredible support at Heol Goffa, this move has completely transformed his life.

This success would not have been possible without his amazing one-to-one, Leah, whose dedication and belief in him have been instrumental in his progress. Alongside her, the supportive teachers and staff have created an environment where he feels, safe, valued, and empowered to grow. We have had the absolute joy of watching our son go from strength to strength, not only physically but also in confidence and communication.

Over the past two years, our son has discovered a passion for football, developed the ability to socialise and communicate with others and even grown confident enough to share his cheeky sense of humour.

We will never be able to fully express our gratitude to Heol Goffa for everything they have done and continue to do for our very special son. Their belief in him has made all the difference and we are forever thankful to the love, patience, and unwavering support they provide every single day.

Heol Goffa isn't just a school. It's a place where children like our son are nurtured, encouraged and given the opportunity to shine. Thank you for everything you do!
